The Birth of a Revolutionary Product

1980

Always Innovating to Spread a Culture of Everyday Comfort and Cleanliness.

Since its launch in the 1980s, WASHLET has continually evolved through the invention of countless innovative clean technologies. This is also our history of creating—and spreading around the world—a new culture of comfort and cleanliness through the shift from only wiping with toilet paper to cleansing with water. As a result of these efforts, in 2017 WASHLET was recognized as the No.1 brand of electric toilet seats with bidet function in the world and in 2019 broke through the milestone of fifty million total units sold. As a worldwide best seller, TOTO will continue pursuing technological innovation to make the lives of people everywhere fresher and richer.

EWATER+
for BOWL

CLEAN SYNERGY

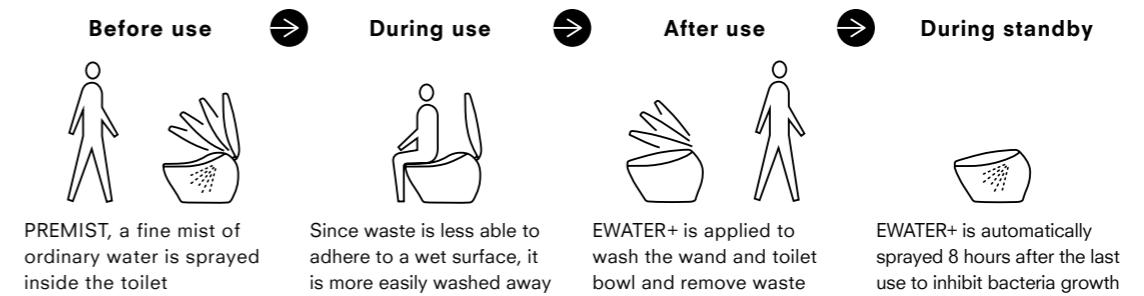

Electrolyzed water reduces waste,
even bacteria you can't see.

EWATER+ washes the wand and toilet bowl where waste and bacteria tend to accumulate and produce stains that can become permanent. Using no chemicals or cleaning agents, EWATER+ provides peace of mind every day that microscopic bacteria has no place to hide.

Survey: Study the effectiveness of EWATER+ by comparing the state of cleanliness of toilets that receive no cleaning versus toilets that are self-cleaned with EWATER+. No additional cleaning was allowed. Survey period: One month (Feb. - Mar. 2017). Subjects: Families of four. *Results vary according to usage and environmental conditions. All data collected by TOTO.

How EWATER+ cleans

What is EWATER+?

Produced by electrolysis of the chloride ion in tap water, It is completely free of chemicals and cleaning agents. Over time EWATER+ returns to its original state of ordinary water, make it completely environmentally friendly

EWATER+
for WAND

CLEAN SYNERGY

The wand washes itself inside and out with EWATER+ to maintain hygienic conditions

Before and after each use, the wand automatically washes itself with EWATER+. This thorough cleaning occurs inside the wand as well as all around the exterior. Even when the toilet is not being used, the wand periodically cleans itself to ensure constant hygienic conditions.

Survey: Study the effectiveness of EWATER+ by comparing the state of cleanliness of wands self-cleaned with EWATER+ versus those that are not. No additional cleaning was allowed. Survey period: Two months (Sep. - Oct. 2017). Subjects: Families of four. *Results vary according to usage, environmental conditions, and product type. All data collected by TOTO

Self-cleaning inside the mechanism, too

Self-cleans with water Self-cleans with water Self-cleans inside and out with EWATER+ Self-cleans inside with EWATER+

Always Keeping Conditions Clean

Made of high-quality waste-resistant resin and automatically sprayed with EWATER+ after each use, the wand is extremely resistant to waste and stains. What's more, the wand attaches to the seat, not the bowl, so waste is less likely to even reach it. Though the wand is self-cleaning, you will appreciate how easily you can reach it and wipe it spotless.

FORCES Waste to
SLIDE DOWN

CEFIONTECT

CLEAN SYNERGY

Ultra-smooth ceramic leaves
nowhere for waste to cling.

PREVENTS Waste from
CLINGING

PREMIST

CLEAN SYNERGY

A film of water keeps waste from clinging

CEFIONTECT is an ultra-smooth ceramic glaze that coats the toilet bowl. Its microscopic surface ridges are far smaller than waste particles, leaving no place for waste to gain a foothold. Extremely durable, CEFIONTECT is designed for enduring beauty and cleanliness.

Enlarged sectional image of toilet surface

What makes CEFIONTECT so durable?

Glass layers are burned onto conventional glaze, making CEFIONTECT an extremely durable material.

CEFIONTECT toilet micrograph *1µm=0.001mm

Eliminating the microscopic gaps where waste hides

Conventional ceramic may appear perfectly smooth to the eyes, but has gaps where waste, mold and bacteria hide. At just one millionth of a millimeter, CEFIONTECT's surface ridges are much tinier than waste particles.

Water has a strong affinity to CEFIONTECT

Hydrophilic describes organisms and materials that attract water. CEFIONTECT is hydrophilic. Water spreads easily over the toilet bowl, so waste particles easily wash away.

Water hydrophobic

Water hydrophilic

PREMIST

PREMIST automatically sprays water over the surface of the inner toilet bowl before every use. Due to the ceramic's hydrophilic nature, waste washes away more easily.

SWIRLS and EJECTS
Waste Entirely

TORNADO FLUSH

CLEAN SYNERGY

360° cleaning power reaches every spot using less water.

TORNADO FLUSH not only cleans more effectively, it does so quietly using less water. Powerful streams of water merge and swirl 360 degrees, washing every spot inside the RIMLESS toilet bowl.

Powerful washing here waste accumulates most easily

TORNADO FLUSH's dynamic waterjet discharges from near the front of the toilet bowl, travels in a narrow channel along a hairpin curve, and with sustain water pressure thoroughly cleanses the areas where waste accumulates most easily - and then washes the entire bowl clean. Exquisitely high-quality ceramic makes this innovative design possible.

RIMLESS

The RIMLESS design not only leaves no place for waste and germs to hide. It also makes for a much easier to clean toilet

Photocatalytic glaze,
the ultimate cleaning technology,
has the natural power to
decompose waste.

ACTILIGHT elevates toilet cleaning to an extraordinary new dimension. Comprising a bacteria-neutralizing ultraviolet light and a titanium dioxide-fired toilet bowl, this extraordinary technology initiates a photocatalytic process that breaks down even microscopic waste particles.

State-of-the-art materials

Titanium dioxide attracts water to the surface of the toilet bowl, setting the stage for photocatalysis. The toilet bowl's photocatalytic glaze layer also contains zirconium oxide, which provides its extreme durability.

Operates 24 hours a day to maintain hygienic conditions

The photocatalytic process with UV light and titanium dioxide produces Activated Oxygen from the ambient oxygen and water molecules, which further breaks down organic waste and reduces the food source that microbes feed on.

AIR-IN WONDER WAVE

The precise, pleasant,
air rich stream keeps you clean.
And it's always pleasantly warm.

AIR-IN WONDER-WAVE is a technology that uses air rich water droplets to produce a more comfortable washing sensation and deliver more thorough cleansing with less water consumption. Even more, water is warmed instantly as needed, so you need never worry about running out of warm water.

The lustrous lid highlights the elegant curves.

The refined ceramics texture gives elegance to the curvaceous silhouette.

Spacious and with rising curvature toward the rear, the seat achieves unparalleled comfort.

Beautifully refined illumination ensures ease of use even in the dark.

Exquisite from every angle.

Smooth form with clean lines and beautiful proportions.

NEOREST AH

NEOREST RH

Design of the remote control is elegantly minimalist.

Flat seat free of undulating and extruding surfaces.

Straight lines yield a design that harmonizes with a wide variety of spaces.

Softly rounded form accentuates the space.

AUTO OPEN / CLOSE LID

Eliminating the need to touch the toilet surfaces, the lid automatically opens and closes when the toilet is approached and departed.

SOFT LIGHT

Subdued lighting switches on when the toilet is approached, so users do not have to disturb themselves at night with a bright bathroom light.

HEATED SEAT

The moment you approach the toilet, the seat begins rapidly warming to a comfortable temperature.

DEODORIZER

Highly effective deodorizing automatically takes places inside the toilet bowl both during and immediately after use, leaving no disturbing odors.

AUTO FLUSH

No need to touch buttons or handles and never worry about someone forgetting to flush — it's automatic after each use.

Ultra-powerful water conservation.
Flushes waste completely every time — no matter where the toilet is located.

HYBRID ECOLOGY SYSTEM

HYBRID ECOLOGY SYSTEM combines two innovative water streams—one from the plumbing system and one from a small tank inside the toilet—to maximize flushing efficiency. Using minimal water, **HYBRID ECOLOGY SYSTEM** is so effective at removing waste that a second flush is never required. What's more, the flushing power remains strong regardless of how high up in a building the toilet is located.

CLEAN SYNERGY means eco-friendly

CLEAN SYNERGY technologies offer a sustainable way to maintain sanitary conditions inside your toilet. Since waste does not accumulate and create stains, there is less need for manual cleaning with detergents.

Sustainable cleaning

WASHLET sprays the non-porous ceramic bowl with EWATER+, to help prevent the buildup of microscopic waste. Free of chemicals and cleaning agents, EWATER+ returns to the water cycle as pure H₂O.

UNIVERSAL DESIGN

WASHLET+ is elegant. All connecting pipes and cords are hidden inside the smooth encasement. Even more than introducing a smarter sense of style to the bathroom, this design ensures easier cleaning and daily use. Various sets are available to choose from.

Toilet and WASHLET combinations that are beautiful from any angle.

Making it possible to pursue beautiful design, WASHLET+ is a new series of toilet and WASHLET combinations that use a TOTO proprietary system to conceal WASHLET water supply hose and electrical cord inside.

The gap between toilet and WASHLET is minimized for better balance.

The simple, smooth shape of the toilet is easy to match with any space.

The clean line of the toilet bowl and lid creates a seamless design that fits any space.

WASHLET+ is loaded with amenities that bring comfort and ease to daily life. Toilet lids that open and close automatically. Automated flushing and deodorizing. Remote control operation. Inviting features turn the daily ritual into a time of relaxation and harmony.

Before use

AUTO OPEN / CLOSE LID

Eliminating the need to touch the toilet surfaces, the lid automatically opens and closes when the toilet is approached and departed.

SOFT LIGHT

Subdued lighting switches on when the toilet is approached, so users do not have to disturb themselves at night with a bright bathroom light.

While sitting

HEATED SEAT

The moment you approach the toilet, the seat begins warming to a comfortable temperature.

DEODORIZER

Highly effective deodorizing automatically takes place inside the toilet bowl both during and immediately after use, leaving no disturbing odors.

When Standing

AUTO FLUSH

No need to touch buttons or handles and never worry about someone forgetting to flush — it's automatic after each use.

“Featuring TOTO CLEAN SYNERGY technologies, WASHLET+ uses less water and eliminates the need for chemicals for cleaning. The most advanced models consume only 3.8L of water per flush and RIMLESS design reduces cleaning to a simple wipe. WASHLET+: sanitary conditions plus conservation of Earth’s precious resources.”

More flushing power. Less water.

The flushing system combines TORNADO FLUSH, which flows dynamically from two openings, with a dense and powerful water stream that washes over the entire bowl to get rid of waste. After every powerful flush, the toilet bowl reappears clean anew.

Preventing wasted water

Using just 3.8L of water, the Powerful TORNADO FLUSH uses a lower volume of water without sacrificing performance. Auto flush automatically determines whether to use a small or full flush, preventing wasted water.

Clean Synergy means eco-friendly

Clean Synergy technologies offer a sustainable way to maintain sanitary conditions inside your toilet. Since waste does not accumulate and create stains, there is less need for manual cleaning with detergents.

Sustainable cleaning

WASHLET sprays the non-porous ceramic bowl with EWATER+ to help prevent the buildup of microscopic waste. Free of chemicals and cleaning agents, EWATER+ returns to the water cycle as pure H₂O

BATHTUB

The posture of an astronaut resting in space

ZERO DIMENSION bathing brings freedom from gravity, releasing stress on joints and encouraging ultimate relaxation.

The brain in a state of tranquility

Research has shown that the ZERO DIMENSION bathing posture reduces activity in the part of the brain that houses the language function. This is the reason Zero Dimension bathing feels calming and relaxing.

Exclusive features make every bath a luxurious occasion.

NECK BATH

With variable pillow positions ensuring stability, people of all body shapes can enjoy the warmth of the bath from above the shoulders to the neck.

AIR-JET

Fluctuating streams of air bubbles rise from below and envelop the body with a soothing sensation.

LED LIGHTING

In the outer perimeter of the tub's base, LED LIGHTING supplies a dream-like ambience.

GALALATO MATERIAL

Offering outstanding durability, the tub is made of GALALATO artificial marble and constructed using TOTO's innovative sandwich configuration.

CONTROLLER

The electrostatic CONTROLLER is operated by the slightest touch.

RECLINE COMFORT

Nestled in comfort, feel your body and mind release into a state of tranquility.

The weight of the head releases onto the headrest, the body receives the sensation of a comforting embrace. The natural S-curve of the spine is maintained all along the neck and down the back, encouraging deep release. This position provides a deep sensation of ease and tranquility. It is a bathing experience that brings relaxation beyond expectations.

Bathing position comparison

ZERO DIMENSION

The posture of an astronaut resting in space ZERO DIMENSION bathing brings freedom from gravity, releasing stress on joints and encouraging ultimate relaxation.

RECLINE COMFORT

CONVENTIONAL

The weight of the head releases onto the headrest, the body receives the sensation of a comforting embrace. The natural S-curve of the spine is maintained all along the neck and down the back, encouraging deep release. This position provides a deep sensation of ease and tranquility. It is a bathing experience that brings relaxation beyond expectations.

In a conventional bathtub, the low water height and a rounded low back make complete relaxation difficult to attain. The shoulder and neck area do not receive warmth from soaking and the bathing position can feel tight and cramped.

COLOR

You can choose between a high-gloss finish that looks like ceramics or a matte finish with a subdued texture.

SHOWER	218
---------------	-----

A Variety of Colors & Finishes

Many colors and finishes to brighten up carefully designed spaces.

We offer 12 rich, original colors and finishes that add an accent to spaces and facilitate advanced styling.

ZA series

F A U C E T

Lightness and dignity in a natural shape
for a timeless design.

Sharp edges, the beauty of
generous curves, and the
contrast of polished and hairline
finishes combine in a modulated
design that achieves balance of a
different order. The handle, asym-
metrically shaped like a small
stone, is beautiful from any angle
and settles in rhythmically.

ZA series

An asymmetrical faucet handle and washbasin bowl in beautiful harmony

With the thinness of a flower petal, the organically shaped ZA series handle matches the delicate curve of the washbasin bowl in a way that suggests a breeze or a melody, further enhancing the appeal of the design for a fresher everyday in spaces that share its natural motif.

A precise, ultra-thin form delivers a tranquil, keenly framed beauty.

The smooth, flat, mirror-like surface and ultra-thin edge generate a contrast in two dimensions whose overwhelmingly delicate look-make possibly by advanced processing technology-shares a design philosophy with the square-lined, sharp edged washbasin bowl.

Enhancing flow and gesture,
the design fits the sharp washbasin bowl.

A bundant water flows like a
waterfall from the horizontal
spout, while the handle can be oper-
ated gracefully with a gentle pinch
of the fingers. Beautifying even the
flow of water and human gestures,
the design resonates with the sharp,
square washbasin bowl to create a
richer space.

GE series

FAUCET

The beauty of traditional craft in a characteristic sculptural form.

The sharp, taut V-shaped edge that extends up to the end of the spout generates multi-sided reflections revealing a range of expressions. The polished gold finish further accentuates the distinctive design for a richer, more luxurious look that helps generate extraordinary, inspirational spaces.

The breadth and symbolism of classical design in a contemporary form.

With the composure of an elegant serif typeface and a base shaped to reconfigure the stability at the heart of traditional architecture, we pay homage to designs that have stood the test of time while transitioning to a modern design that reflects the present day.

The two-handle design captures the rich aesthetic of an elegant hotel.

A lined along a straight line, the faucet and handles present a strikingly consistent design. The horizontal line crossing each base serves as a boundary that tightens the gaps between them. The low center of gravity adds a dignified accent to interior spaces without getting in the way.

GM series

reddot award 2019
winner

FAUCET

Bold parallel arches
and reflective curves in
an assertive design.

Suggesting the majestic dignity of outstanding architecture, the shape combines—in the arch of its spout and a columnar body—elements seen in traditional shrine gates. Its imposing presence is further accentuated by the highlights that trace its edges.

GB series

F A U C E T

The stately squareness and beveled edges imbue a space with dignity.

Following edges so gently beveled you'll want to draw your finger along them, the balanced highlights on the glossy black finish accentuate the shape of the gradually narrowing spout and the sleek silhouette of the whole.

Finishing color subject to availability. Please check with your local salesperson for more information.

GF series

FAUCET

The refined cylinder and fine finish inspire a high-end luxury feel.

The delicate workmanship at the joints and gaps are set off to advantage by the simple shape. The high-quality, spindle-processed handle has a delightful feel to the touch. Using a hairline finish for the handle and a polished finish for the body generates a rich contrast in textures even while using the same rose gold color.

Finishing color subject to availability. Please check with your local salesperson for more information.

Subtle and sharp,
this elegant, timeless design
upgrades the everyday.

The subtle curves of the spout and handle, the sharpness of the edges, and the refined proportions of the whole combine in quiet harmony to create an atmosphere of advanced elegance.

GO series  red dot award 2017
best of the best

F A U C E T

Swelling and supple,
the organic form leaves
a graceful impression.

With a spout and handle that swell and a body defined by supple curves, the faucet suggests a plant bathed in sunlight, reaching higher and higher as it grows, with a soft, sculptural beauty that sustains both space and user.

GR series  reddot award 2017 winner

F A U C E T

The weight of a metal ingot cut at right angles tightens up a space.

The design contrasts found in this marriage between sharply honed edges and the gentle curves at the top of the spout and handle generates a regal air while further bolstering its imposing sculptural beauty.

GS series  red dot award 2018
winner

F A U C E T

A modern design wrapping a relaxed, unassuming shape in matte black.

Adding soft curves to a universal basic shape results in smart proportions that convey a gentle visual and textural impression in a timeless design suited for everyday use. Expanded color and finish options leave an even fresher impression.

Finishing color subject to availability. Please check with your local salesperson for more information.

COMFORT GLIDE

F A U C E T

Everyday ease-of-use that is grounded in the senses.

Comfort. For TOTO, this does not simply mean comfort of movement. Ease of use, when it lasts a long time, becomes comfort in itself. For this purpose, TOTO has developed the internal valve based on users' touch. Designed from the ground up to provide a fundamental comfort in operation.

Special coating for prolonged comfort.

The ceramic disc, a core valve component, is covered with a special DLC (Diamond Like Carbon) coating. This ensures long-lasting quality over conventional faucets that use a greased valve.

Precise flow control, exclusive to TOTO.

Our exclusive technology means new functionality. We took the core component of the valve, the ceramic disc, and customized its shape for ease of use. Compared to conventional faucets, it's easier to control water flow when just a little is required, such as when you are washing a contact lens. Because you can achieve the right amount of water flow instantly, it helps conserve water. *Adjustable flow functionality is not available on side-handle models.

**Embraced in warmth,
relaxed and ready for rest.**

The feeling of a warm bath, in a shower. This is the power of the WARM SPA. A single pillar of warm water running quietly from the showerhead. When water hits the body, it follows the curves and envelops it without a splash. A completely new shower experience, warming your body efficiently.

Let no heat escape. Be warmer.

Smooth water release means less heat loss. The water cloaks your body, quickly warming it. This feature is now available not only in conventional overhead showers, but hand showers too.

Large drops of water, rich and dense, giving a luxurious sense of comfort.

Comfort Wave emits powerful, swinging streams of larger-than-usual water drops for an ultra-comfortable, moderately intense shower that uses only a small amount of water. Mixing conventional shower spray into the flow adds pleasant stimulation.

Stimulates body and mind and awakens the senses.

Active Wave specializes in the swinging, large-drop streams found in Comfort Wave. More powerful than Comfort Wave, it offers a more intense showering experience.

SHOWER

AERIAL SHOWER

Aerial Shower aerates the water to make the shower experience more enjoyable. You feel as though you're standing below a particularly full stream without any increase in the usage of water.

Advantages

Comfortable shower experience, less water consumption

MECHANISM

A secret chamber mixes the air into the water without slowing down the flow. Results in full coverage shower that uses less water.

AERIAL PULSE

TOTO fixed shower heads are equipped with Aerial Pulse technology offering a voluminous flow with little water consumption. Air is drawn in through the shower head and added to the water. The shower head pulses the enlarged water droplets as they fall to give a relaxing experience.

Advantages

A more enjoyable shower experience, less water consumption

MECHANISM

The pulsing effect is created by rapidly altering the concentration of air inside the water droplets.

GYROSTREAM

The bathroom is a space where health and well-being take centre stage. Gyrostream offers the same relaxing effect that you'd find in a bathtub. Rotating nozzles deliver a stimulating massage that spreads its effect over a wide area of the body.

Advantages

Massage function, consistently keeps the body warm

MECHANISM

Water sprays out through nozzles that rotate in two different directions resulting in a powerful flow of water. These water vortices provide an invigorating massaging effect.

Z Selection

SHOWER

A new style that crystallizes bold design and advanced technology.

A higher-dimension integration of design and technology, with bold linear shapes that make hairline accents shine, artfully arranged controls, and precision details reminiscent of high-end audio equipment. Brought together in a single, shelf-equipped unit, these combine in a richer shower experience.

Z Selection

SHOWER

Meticulous attention to design and function for an even richer shower.

Stainless steel panels in a rich array of colors and finishes combine with artificial marble shelf-tops. The fine materiality resonates richly in the shower room, raising it to a higher level. Equipped with a rack that enables unobtrusive storage and an overhead shower that envelops the entire body for a rich shower time.

Thermostatic Shower Column with Shelf

G Selection

Choose your ideal showering experience at the touch of a switch.

For the hand shower we installed a switch right at your fingertip, and for the over head shower the switch is located inside the shower-head. For the hand shower you can change easily between WARM SPA / COMFORT WAVE / ACTIVE WAVE, and for the over head shower between WARM SPA and COMFORT WAVE. Feel free to enjoy the perfect shower for your mood.

Prevents getting too hot and is beautifully shaped for a more pleasant daily bath time.

When you use hot water, the surface of the faucet also gets hot. TOTO's solution is a unique innovation in design. By covering the path of the hot water with a layer of cold, HEAT PROTECT is able to prevent burns when accidentally touching the fixtures.

Industry-leading compactness brings sophisticated style.

We created the industry's smallest diameter of Ø45mm while providing superior insulation performance.

Prevents rapid rises in temperature for a safer bath time.

Let's say a family member uses water while you are in the shower. This can often create a sudden, unwanted increase in the shower water temperature. SAFETY THERMO prevents this from happening. A coil made of Shape-Memory Alloy (SMA Coil) reacts instantly to water temperature change, keeping the temperature from rising.

Temperature control, 6 times stronger.

Our SMA coil detects water temperature instantly. Compared to a traditional wax type, it reacts to hot water 6 times faster (in-house comparison).

A compact unit offering freedom of choice for more beautiful bathrooms.

Concealed faucets liven up the bathroom. TOTO's MINI UNIT is a technology that gives you more freedom. We don't match the concealed system to each trim, instead we use a shared module. You can choose the functionality you need such as a single lever type, thermostat type, or touch button type, and also make choices based on design features such as circle or square fixtures.

Easier to install. Less load on the frame.

A high degree of flexibility when installing the MINI UNIT is one of its most attractive features. We were able to achieve one of the industry's smallest and lightest bodies for the concealed system. It puts only a minimal load on the architectural frames and has improved manageability during installation. In order to conceal the unit, the wall only needs to be 97mm, and the system is able to absorb installation errors of ±13mm.

Industry-leading miniaturization. Beauty in balance.

We shrunk the unit to one of the industry's smallest. The trims are also some of the most compact. In addition, our progress towards uniform sizes mean units can be used simultaneously to create a beautiful space. We also strived to make the trim as thin as possible. A bathroom of unity and style can be yours.

Shower Systems

Choose from three types to match your lifestyle and create a bathroom all your own.

TOTO showers. Besides water flow and design, you can choose the number of outlets as well. From something simple to highly decorated, options are available based on your lifestyle and style preference.

1 OUTLET

The most simple.
A shower space designed with 1 shower outlet (choose between a hand shower, over head shower, or bath spout). It's the simplest way to enjoy a comfortable bath experience.

2 OUTLET

Enjoy a different kind of bath.
A shower space designed with 2 shower outlets (hand shower + overhead shower, for example). Depending on how you are feeling that day, you can change up between hand shower and over head shower

3 OUTLET

The most varied way to have fun.
A shower space designed with 3 shower outlets (hand shower, overhead shower, bath spout). That system that will give you the most varied shower experience.

A minimalist design that exudes grace and sophistication is the over arching aesthetic of the Le Blanc series. The shapes are reminiscent of the smooth forms of a feminine figure, adding a touch of elegance and tenderness to the decor.

SELF POWER

TOTO automatic faucets no longer need power from an electrical outlet. The energy from the flowing water is used to charge a battery that powers the faucet. The faucets require practically no maintenance.

Advantages

Easy to use, reduces physical contact, requires no external power supply, uses little energy

AUTO FUNCTIONS

The automatic faucets feature an almost invisible sensor in the spout. It registers every hand movement precisely and is tamper-proof.

Advantages

Ease of use, no need for direct contact with the toilet, regulates energy consumption

“INNOVATIVE”

throughout the Next Century

TOTO HISTORY

1917

The company is established by Kazuchika Okura under the name, TOYO TOKI CO. LTD. which is later renamed TOTO

1923

The Great Kanto Earthquake strikes devastating Tokyo. A sewage system is built during the reconstruction, leading to a rapid growth in demand for sanitary wares

1946

After World War II, TOTO begins manufacturing metal fittings and faucet in addition to ceramic

2015

The TOTO Museum in Kitakyushu was opened on the occasion of the company's 100th anniversary. Showcases the evolution of the business and its products. The museum highlights the historical landmarks that changed Japanese bathroom culture, including the move from rural to city living. TOTO aims to promote the appeal of this complex as a point of contact with visiting customers and clients.

2017

TOTO exhibited at the ISH2017 - the world's large international trade fair in Frankfurt, Germany for sanitary wares, and renewable energy. This is the fifth exhibition with the new theme - "Life Anew." Clients will not only experience the TOTO unique technology but will also come in contact with our products. Through this exhibition, TOTO will share the message on its 100 years of evolution unique technological innovation.

Sold Worldwide

TOTO No.1
ブランドに認定
WASHLET

50 million WASHLET sold worldwide

2019

Ever since the launched from 1980s, WASHLET design and features keeps improving from customers and clients experiences. By 2019, over 50 millions units had been sold. WASHLET is ranked no.1 spray seat brand in the world. Today, with focus on wellness, TOTO continues to develop advanced new technologies for WASHLET.

1980

TOTO launches WASHLET, providing consumers with a whole new level of cleanliness and comfort

1993

NEOREST toilet is launched incorporating WASHLET with a comprehensive range of TOTO's innovation. It brings with it the fullest realization yet of the principle of Clean Technology

2008

TOTO Asia Oceania Pte. Ltd. is established as the regional headquarters of the Middle East, South Asia, South East Asia and Oceania

2013

TOTO Asia Oceania launches its first Technical Center in Singapore. It serves to introduce TOTO's latest product and technologies to customers.
